Featured Podcast

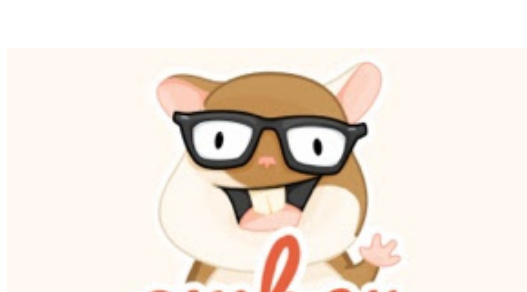

Alex Sadovsky, Oracle Data Cloud

What has been your experience at the conference so far?

It's been great. I've met a lot of different people who are working on really similar problems to me and so that's always nice 1) to learn a little bit 2) to trade war stories of "oh you have problems with this...so do I" so that makes you feel a little better and then (3) also to go back to my team and just be energized about "here's the solutions I saw, here's some cool stuff, let's try this out on our own."

About Qubole

Qubole's cloud-based platform addresses the challenges of processing huge volumes of structured and unstructured data. It runs on public clouds such as AWS, Azure, Oracle and Google Cloud Platform to help enterprises generate value from their big data while enabling their operations teams to be nimble and adaptive to their users' needs.
